more about me
**https://zahit.mx**

## PROFILE

I am passionate about technology, acquiring new knowledge, and implementing formal solutions through design patterns. I founded a company at the age of 23, which gave me the ability to see software development from a commercial and business perspective.

## EDUCATION

**Bachelor of Computer Science**
ESCOM - IPN

**PROGRAMMING TECHNICIAN**
CECyT 9 - IPN

## LANGUAGE

English ▰▰▰▱

## EXPERIENCE

**IT Manager**
**Gaia design - www.gaiadesign.com.mx**   2021 - 2023

• Led three teams responsible for transforming our own ecommerce brand into a marketplace with over 50,000 products.

• The most significant technical achievement was the successful implementation of microservices, resulting in a drastic reduction in pricing campaign time from 8 hours to just 13 minutes.

• Overcoming the main commercial challenge involved implementing balancers and service workers for a controlled migration based on KPIs and OKRs, such as the conversion rate of users.

• On a personal and administrative level, managing three highly successful development teams under methodologies like SCRUM and Canvas has been my greatest challenge. I take pride in challenging their skills and spearheading the adoption of new technologies.

**CTO**
**Xenotech Solutions - www.xenotech.mx**   2018 - 2021

We delivered projects primarily for Korean companies in Monterrey. Our expertise includes developmento of ERPs utilized by suppliers of major companies like KIA, Whirlpool, and LG. Additionally, we collaborated with ITESM to develop systems currently being used for student communications. Our technology stack consisted of PHP frameworks such as Laravel and Symfony, React Native for mobile applications, and GoLang and AWS Lambda for microservices.

**CTO**
**Básico FM- www.basico.fm**   2011- 2018

**Developer - Tech Lead**
**LMS Loyalty Marketing Services**   2009- 2011

## TECHNICAL SKILLS

PHP (V5 to V8):
• Laravel
• Code igniter
• Symfony 5, Symfony 6:
  ▪ Easy admin bundle
  ▪ Sonata admin bundle

Microservices:
• Golang
• AWS Lamnda
• Serverless framework

Javascript:
• JQuery
• React (Next JS)

CSS / Bootstrap
Serverless framework
AWS Lambda

Databases:
• MySQL
• Mongo DB
• Dynamo
• Redis

Python
• Django 4

React Native
AWS EC2 / Ubuntu
Nginx (LEMP servers)

CI/CD Pipelines
• Bitbucket
• Git hub

CI/CD Pipelines
• Bitbucket
• Git hub

Test automation
• Jmeter
• Flood
• Katalon

Cloudflare:
• Origin groups
• Load balancers
• Service workers

Algolia
Rabbit MQ
Headless Dato CMS
